Don't be a victim of identity theft.....

Is your company upgrading its IT assets, are you returning a leased PC, are you planning to recycle or remarket your computer?

You or your company could be a potential victim of identity theft if all the sensitive and confidential information stored on the hard drive has not been completely erased.

Bad publicity of a company, as a result of data leaks, could significantly damage a company's reputation, leading to a huge loss of valued customers.

Non-compliance with regulatory requirements could result in hefty fines or expensive lawsuits which could also threaten a company's existence. UK Government accredited data destruction service. Collections throughout Northern Ireland.

NEW! Data Wiping & Media Destruction: HDDs / CD-ROMs / DAT Tapes / Floppy Disks/ Video & DVD

Don't be next. Secure Data & Media Destruction Servicefrom AMI.
